

## Overview

Welcome to HP StorageWorks Continuous Access EVA, the remote replication solution for HP StorageWorks Enterprise Virtual Array (EVA).

### What's new in this release?

- HP StorageWorks Replication Solutions Manager graphical interface, including multiple tree views and sortable lists of replication resources
- HP StorageWorks Replication Solutions Manager host agents, with the ability to mount volumes and run jobs directly on storage hosts
- Job language and job templates to automate replication tasks
- HP StorageWorks Replication Solutions Manager Command Line User Interface

## What's next?

1. Verify that you have met the prerequisites for this product:
  - Two (or more) properly configured EVA 3000 or EVA 5000 arrays. See HP StorageWorks EVA documentation, available from <http://h10025.www1.hp.com/ewtf/wc/manualCategory?lc=en&cc=us&product=296426>.
  - A properly configured SAN (dual SAN recommended). See the *HP StorageWorks SAN design guide* at <http://hp.com/go/sandesignguide>.
  - Two or more HP Continuous Access EVA license keys, obtained from the License Key Renewal web site. See the *License key retrieval instruction sheet* in the license kit.
  - HP StorageWorks Command View EVA 3.3 or later on a management server or HP Storage Management Appliance.
  - Properly configured long-distance gateways (optional). See the *HP StorageWorks Continuous Access and Data Replication Manager SAN Extensions reference guide* available from <http://h18006.www1.hp.com/products/storage/software/conaccesseva/index.html>.
2. Install HP StorageWorks Continuous Access EVA license keys. See *HP StorageWorks EVA replication license key installation instructions* in the license kit.
3. Read the product release notes for the latest information.

4. Install HP StorageWorks Replication Solutions Manager. See *HP StorageWorks Replication Solutions Manager installation guide*.

For a complete user guide to local and remote replication, see online Help in HP StorageWorks Replication Solutions Manager.
